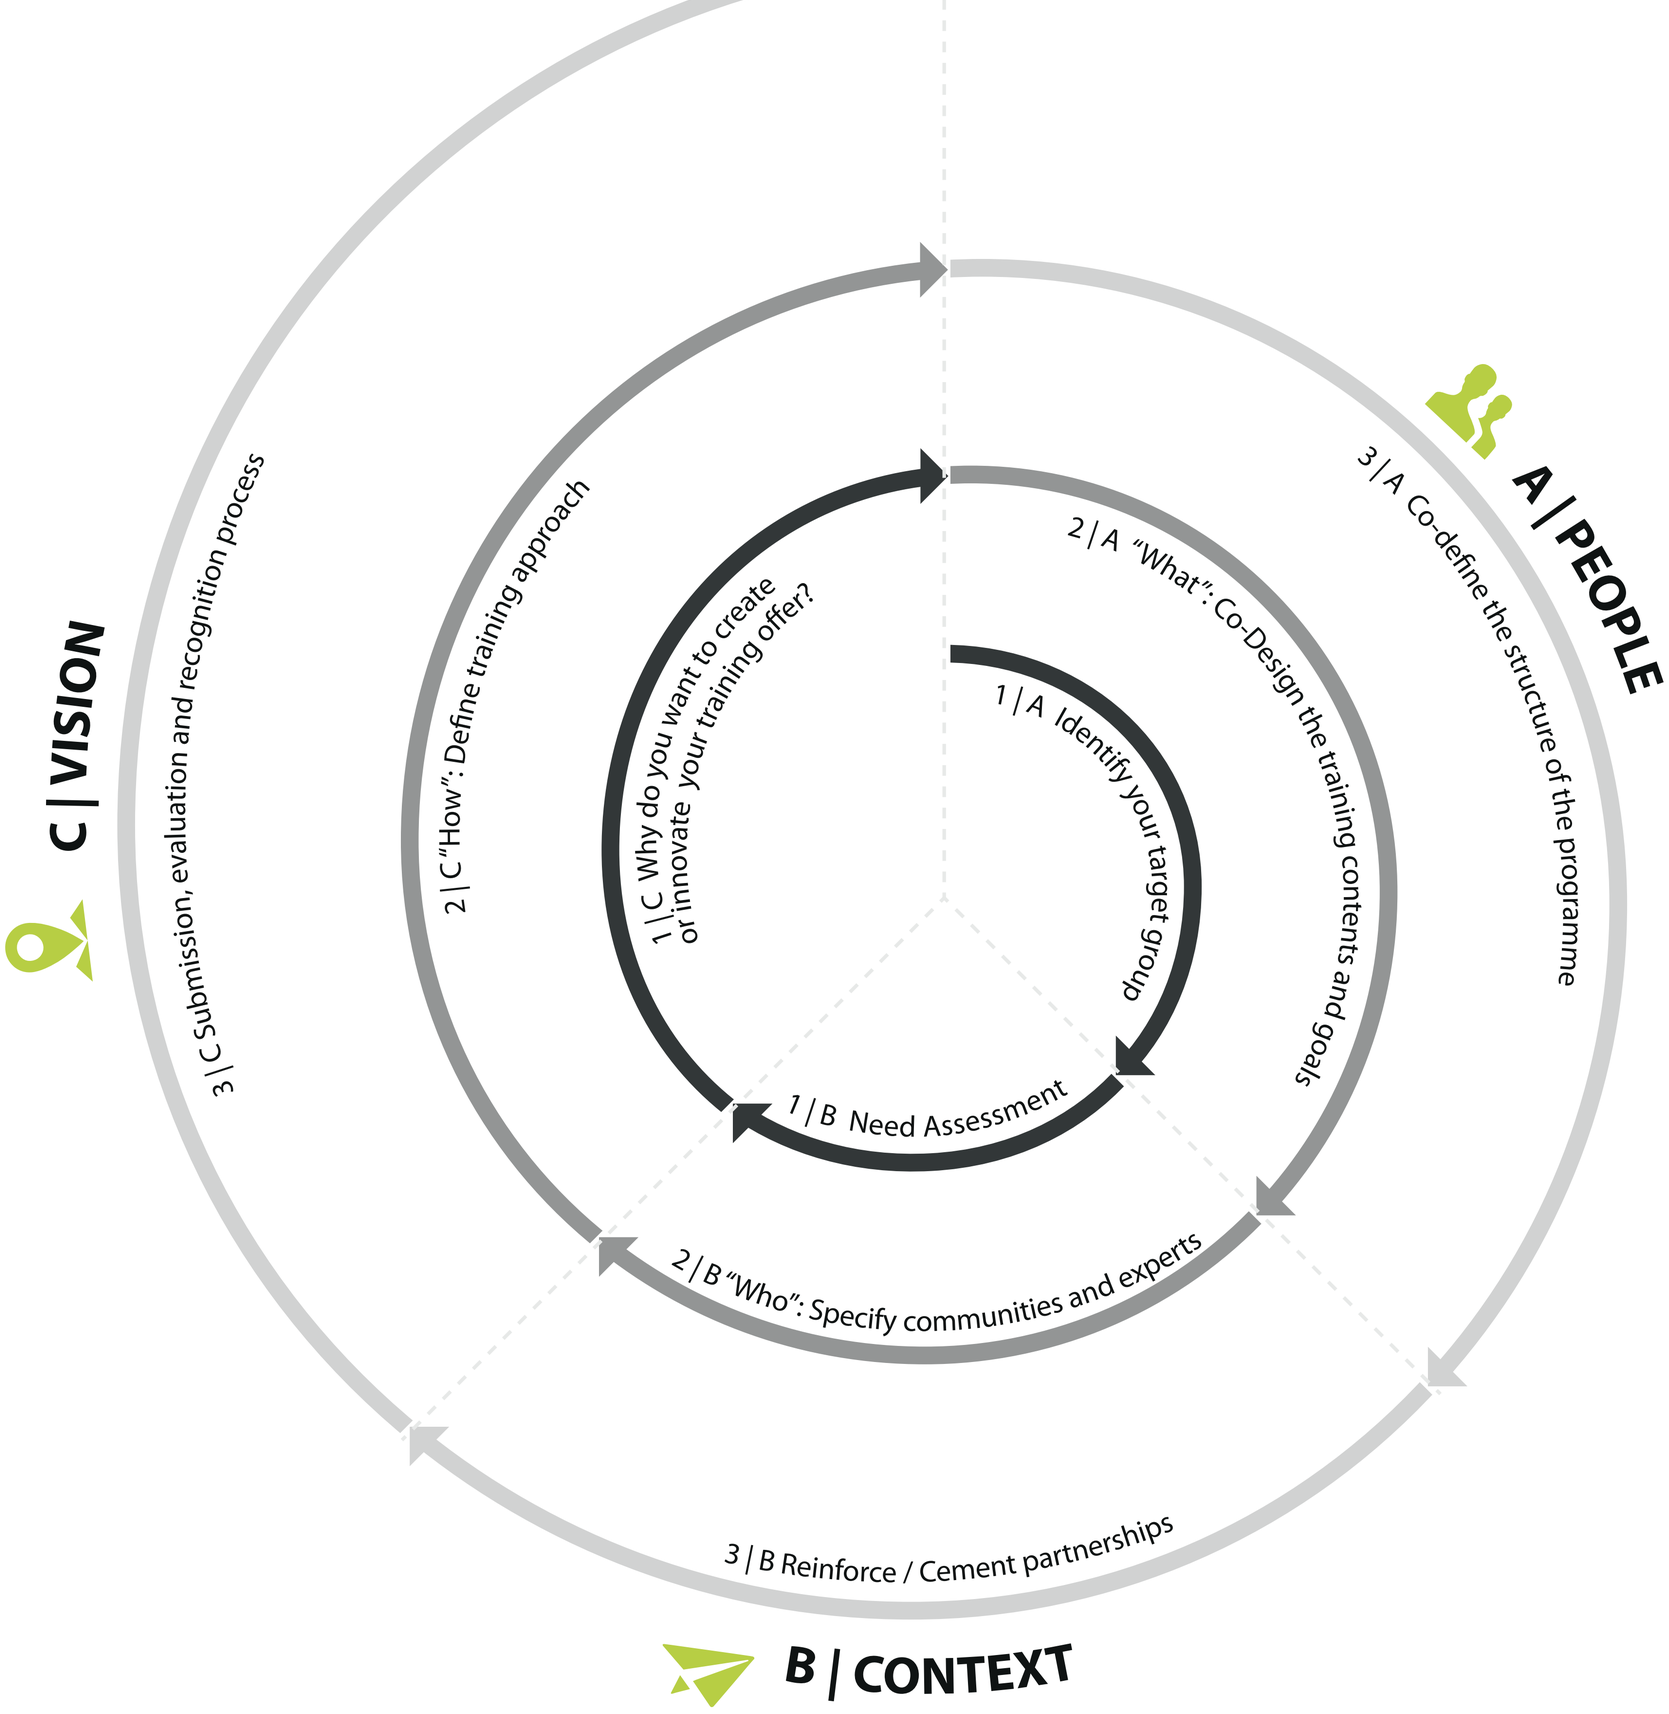
Caracol Toolkit

Knowledge, Skills and Experience

This section describes an ideal journey for the co-design and implementation of both academic and non-academic curricula, integrating tools for the construction of experiential learning paths with the best training practices of coworking spaces and innovative communities.



In this section, you will:

- Share and discuss
- Use external tools
- Take notes on this canvas

Field of intervention:

- **A** People
- **B** Context
- **C** Vision

Level of depth:

- 1 | **Understand**
- 2 | **Interact**
- 3 | **Organize**

Use these canvases in parallel with the textual guide: here you can take notes of the progress you have made while putting into practice the steps illustrated in detail inside the guide. The guide provides an in-depth explanation and several open reference tools for the implementation of each step in this spiral path, called "Caracol". Follow the spiral path starting from the center - "Understand" - towards the outside - passing through "Interact" and "Organize" - and going back when necessary.
